

Protective Partition, Barrier & Wall Cladding Solutions

In an ever-changing environment, we at Palram Americas are available to support you and your business with effective solutions to protect our communities.

For service providers at retail and public facilities who need to be better protected during frequent encounters with shoppers and visitors, we offer a wide array of protective partition solutions, made of Polycarbonate or PVC transparent sheets, which reduce chances of viral transmission.

Learn more: [PALSUN®](#), [PALCLEAR®](#), [PALGARD®](#) and [SUNLITE®](#) solutions.

For caregivers and service teams whose critical roles require mobility at public places, we offer barrier materials for protective facemasks that can provide full coverage with high clarity and transparency.

For healthcare facilities, laboratories and food preparation areas, that require high bio-security standards and hygiene, we offer [PALCLAD® PRO HYG](#), an active antimicrobial cladding system that kills or inhibits the growth of a wide variety of pathogens on contact.

How to Disinfect / Sanitize Polycarbonate and PVC Surfaces

Isopropyl Alcohol

Alcohol solutions (isopropyl alcohol / purified water) or wipes with at least 70 percent alcohol are effective for sanitization of most hard surfaces. First, clean the surface with soap and water. Apply the alcohol solution (do not dilute it) and let it sit on the surface for at least 30 seconds to disinfect. Wipe dry with a clean cloth.

Hydrogen Peroxide

Household (3 percent) hydrogen peroxide is effective in deactivating most viruses within 6 to 8 minutes of exposure. Pour it undiluted into a spray bottle and spray it on the surface to be cleaned, but let it sit on the surface for 8 minutes and wipe dry with a clean cloth.

For use of other sanitizing agents, please contact the manufacturer to ensure compatibility to PVC and PC prior to use.

Our global manufacturing facilities are operative as per local government guidelines.
