This document covers safety data concerning the following products:
PALSUN® BASIC SERIES
PALSUN® UV SERIES
PALSUN® SPECIALTY SHEET SERIES
PALSUN CS®
PALGARD™
SUNTUF®
SUNTUF® PLUS
SUNSKY®
SUNOPAK™
DYNAGLAS®
SUNLITE®
SUNLITE® PLUS
THERMAGLAS®
SUNPAL®
SUNGLAZE™
PALTILE™
SUNTOP®
SUNSPHERE™
EDGELOCK™
CHAIR-MAT

1. Identification of the article and the company
1.1. Identification of the article
Trade Names: PALTUF®, PALSUN®, PALSUN® FR, PALGARD™, SUNTUF®, SunSky®, SUNOPAK™, DYNAGLAS®, SUNLITE®, Thermaglas®, SUNPAL®, SUNGLAZE™, PALTILE™, SUNTOP®, SUNSPHERE™, EdgeLock™, Chair-Mat.
Product Name: Solid and Foamed Polycarbonate sheets
Product Name: Polycarbonate Homopolymer
CAS Number: 25307-45-0
UN Number: None
ACX Number: X1017917-2
RTECS: Not listed
Material Synonyms: PC
NFPA Ratings: Health=0, Fire=1, Reactivity=0

1.2. Company Identification & Contact
Israel - Palram PVC
Address: Ramat Yohanan, 30035, ISRAEL
Tel: +972 4 8459 900
Fax: +972 4 8444 012

UK - Palram Polycarb Americas
Address: Unit 2, Doncaster Carr Industrial Estate, White Rose Way, Doncaster DN4 5JH, UK
Tel: +44 1302 380738
Fax: +44 1302 380739

Americas - Palram 2000
Address: 9735 Commerce Circle, Kutztown, PA 19530, USA
Tel: +610-285-9928
Fax: +484-647-8210

Local: Call your nearest poison control center.

2. Composition / Information of Ingredients
Main polymer: Polycarbonate – approximately 100 wt%.
Pigments and additives used to enhance specific properties are encapsulated in the polymer resin matter.
No cadmium, or other heavy metals based pigments or stabilizers used. This product does not contain reportable hazardous ingredients as defined by OSHA Hazard Communication Standard.

3. Hazards identification
No particular hazards known.
3.1. Health Hazard Data
3.1.1 Effects of a Single Overexposure
Swallowing: non-relevant
Skin absorption: non-relevant
Inhalation: non-relevant
Skin contact: exposure is not expected to cause adverse health effects
Eye contact: non-relevant

3.1.2 Effects Of A Repeated Overexposure - None currently known
3.1.3 Medical Conditions Aggravated By Overexposure - None currently known
3.1.4 Other Effects of Overexposure - None currently known

In as much as Palram Industries has no control over the use to which others may put the material, it does not guarantee that the same results as those described herein will be obtained. Each user of the material should make his own tests to determine the material's suitability for his own particular use. Statements concerning possible or suggested uses of the materials described herein are not to be construed as constituting a license under any Palram Industries patent covering such use or as recommendations for use of such materials in the infringement of any patent. Palram Industries or its distributors cannot be held responsible for any losses incurred through incorrect installation of the material. In accordance with our company policy of continual product development you are advised to check with your local Palram Industries supplier to ensure that you have obtained the most up to date information.
This document covers safety data concerning the following products:
PALSUN® BASIC SERIES
PALSUN® UV SERIES
PALSUN® SPECIALTY SHEET SERIES
PALSUN CS®
PALGARD™
SUNTUF®
SUNTUF® PLUS
SUNSKY®
SUNOPAK™
DYNAGLAS®
SUNLITE®
SUNLITE® PLUS
THERMAGLAS®
SUNPAL®
SUNGLAZE™
PALTILE™
SUNTOP®
SUNSPHERE™
EDGELOCK™
CHAIR-MAT

4. First Aid Measures
In general handling the material will not cause accidents.

4.1. Inhalation
Route of entry – inhalation: No
If exposed to combustion fumes in high concentration - bring victim to fresh air. Medical attention needed.

4.2. Ingestion
Route of entry – ingestion: No

4.3. Skin Contact
Burns resulting from accidental contact with molten material must be flushed immediately with cold water.
Do not remove the polymer from the skin. Do not use solvent for removal. Medical attention needed.

4.4. Skin Absorption
Route of entry – skin: No

4.5. Eye Contact
Like any foreign body, can cause mechanical irritation. Remove contact lenses at once.
Immediately flush eyes well with copious quantities of water or normal saline for at least 20-30 minutes. If irritation persists, consult physician.

4.6. Notes For Physician
There are no specific notes.

5. Fire Fighting Measures
This material burns with difficulty and generally requires a continuous external flame source to sustain combustion. Without flashover fire conditions it will tend to extinguish it. When forced to burn it will produce a sooty fire.
Main products of combustion are carbon dioxide and carbon monoxide. Some flame-retardant grades will evolve trace quantities of hydrogen bromide on combustion.
Combustion products have been found in independent tests to be essentially non-corrosive.

5.1. Extinguishing Media
Water spray or foam. CO₂ is less recommended due to lack of cooling capacity.

5.2. Extinguishing Media to Avoid
No information currently available.

5.3. Special Fire Fighting Procedures
Personnel without suitable respiratory apparatus should leave the affected area to prevent exposure to toxic or combustible gases.

5.4. Special Protective Equipment for Firefighters
Positive-pressure self-contained breathing apparatus, protective closing, gas mask approved for acid vapors.

5.5. Unusual Fire and Explosion Hazards
Hazardous combustion products may include intense heat, dense black smoke, carbon dioxide, carbon monoxide and hydrocarbon fragments. Combustion products/processing fumes may include trace levels of phenol, alkylphenols, and diarylcarbonates.
Soot emitted when PC is forced to burn may obscure visibility.
During combustion the base resin does not produce hydrogen cyanide, phosgene, acrolein, hydrogen chloride or sulfur dioxide.
The material is not sensitive to static discharge.
Static electricity discharge sparks possible at handling – avoid vicinity of static discharge sensitive materials.

6. Accidental Release Measures
No special precautions and no personal protective equipment needed. Collect mechanically for disposal.
7. Handling and Storage

7.1. Handling

General handling precautions
Avoid mechanical contact with eyes. Use good industrial hygiene practices. Provide adequate ventilation. Secondary operations such as grinding, sanding or sawing may produce a dust explosion hazard. Use aggressive housekeeping activities to prevent dust accumulation; employ bonding, grounding, venting and explosion relief provisions in accordance with accepted engineering practices.

Ventilation
General (mechanical) room ventilation is expected to be satisfactory where this product is stored and handled.

Other precautions
No explosion hazard. In the event of fire, cool and overlap product with water. The material is not sensitive to static discharge. Static electricity discharge sparks possible during handling. Avoid contact or vicinity of flammable materials.

7.2. Storage
Store in a cool shady area. No special technical protective measures required.

8. Exposure Controls / Personal Protection

8.1. EXPOSURE LIMITS
No occupational exposure limits established by OSHA, ACGIH, or NIOSH.

8.2. PERSONAL PROTECTION

Respiratory protection : No special protection needed
Hand protection / protection gloves : No special protection needed
Eye protection : No special protection needed
Other protective equipment/measures : No special protection needed

9. Physical Properties

Appearance : Flat or corrugated plastic sheets
Physical State : Solid
Color : Clear or colored
Odor : None
Density : 1.2 g/cm³
Change In State : Tg =140-150°C, DSC according to ASTM D 792
Boiling Point, 760 Hg : None
Viscosity : Not relevant
Solubility In Water : None
Ph Value : Not relevant
Flash Point : >450°C ASTM D 1929
Autoignition Temp. : >650°C ASTM D 1921
flammability Limit : None
Explosion Limits : None
Evaporation Rate : None
Percent Volatiles : Not relevant
10. Stability and Reactivity

10.1. Stability
Stable.

Conditions to avoid
Excessive heat, or open flame.

Incompatible materials
Oxidizing agents or strong mineral acids can cause reaction.

Thermal decomposition
Caused by fire or overheating during improper processing. Fumes damaging to health may be released.

Hazardous decomposition products
Carbon monoxide (CO) is highly toxic if inhaled, present in combustion fumes of all organic materials;
Carbon dioxide (CO₂) in sufficient concentrations can act as an asphyxiant, present in combustion fumes of all organic materials;

10.2. Reactivity
Hazardous polymerization: Will not occur
Hazardous reactions: None.

11. Toxicological Information

Independent testing and many years of experience confirm that this material has very low toxicity. The International Agency for Research on Cancer does not list this material as a confirmed or suspected carcinogen. In rats an acute LD₅₀ > 5 gr/Kg of body weight. Industrial hygiene studies have shown that under normal and expected conditions of use of PC materials, exposures are well below applicable limits.

11.1. Acute Toxicological Information
Acute oral toxicity: Oral LD₅₀ (rat) > 5g/kg, estimated.
Acute vapor exposure: Processing fumes from similar products are not considered toxic. In acute inhalation tests, laboratory rats were exposed to processing fumes at concentrations exaggerating those that would likely occur in workplace situations. No death or signs of toxicity, except transient irritancy in some cases, were noted during the 6-hour fume exposure tests. There were no distinct or consistent treatment related tissue or organ changes noted in gross necropsies.
Primary skin irritation: Product not considered primary skin irritant. Draize Skin Primary Irritation Score (rabbit) for similar products, in finely divided form, for a 24-hour exposure is 0.
Eye irritation: Product not considered primary irritant. When similar products, in finely divided form, were placed into the eyes of rabbits, slight transient redness or discharge occurred – consistent with the expected slightly abrasive nature of product.
Sensitization: Not expected to be a skin sensitized based on results of Modified Buehler Guinea Pig Sensitization Test from similar products. Dermal LD₅₀ (rabbit) > 2g/kg, estimate.
Chronic effects: In sub-chronic testing, the base resin was considered physiologically inert when fed to rats for 8 weeks at a dietary level of 6%.
Carcinogenicity - NTP: not tested
- IARC: not listed
- OSHA: not regulated
This document covers safety data concerning the following products:

11.2. Other Toxicological Information
No known toxicological effects with normal use. For heating see section 10.

11.3. Additional Information
No additional toxicity information currently available.

12. Ecological Information

12.1. Persistence and Degradability
Detailed studies have not been conducted concerning the environmental fate of the product. According to present knowledge no unfavorable ecological effects are to be expected. Not generally hazardous to water. Insoluble in water, non-toxic solid.

Mobility : No information currently available
Persistence and biodegradability : Biodegradation period - tens of years.
Bioaccumulative potential : No information currently available.

12.2. Environmental Riscs
No hazard expectation to terrestrial or aquatic flora and fauna.

Ecotoxicity : LD_{50} (rats) > 5 gr/kg
: IC_{50} (bacterial inhibition) - no data available
Aquatic toxicity : LC_{50} (daphnia magna) - no data available
: LC_{50} (fathead minnow – fish) - no data available

12.3. Other Information
All available ecological data have been taken into account for the development of the hazard and precautionary information contained in this safety data.

13. Disposal Considerations
The product is not considered hazardous under current EPA hazardous waste regulations. Recycling is the preferred method of disposal. Alternatively, the product may be disposed of in an approved landfill. Incineration in accordance with federal, state and local regulations – collected processing fume condensates and incinerator ash should be tested to determine waste classification. All wastes should be evaluated in conjunction with applicable solid and hazardous waste regulations, Toxicity Characteristic Leaching Procedures (TCLP), and disposed of as appropriate. This product does not contain any cadmium or other heavy metal pigments or stabilizers. It is the user’s responsibility to dispose of all wastes in accordance with all national and local regulations at properly permitted or authorized facilities.

14. Transport Information
DOT PSN Code : ZZZ
DOT Proper Shipping Name : Not regulated by this mode of transportation
IMO PSN Code : ZZZ
IMO Proper Shipping Name : Not regulated by this mode of transportation
IATA PSN Code : ZZZ
IATA Proper Shipping Name : Not regulated by this mode of transportation
AFI PSN Code : ZZZ
AFI Proper Shipping Name : Not regulated by this mode of transportation
Additional transportation data : Not currently regulated under Department of Transportation regulations
Labelling : No labeling is required in accordance with the EEC directives
Placarding : No placarding is required in accordance with the EEC directives
Special transport requirements : None
Packaging : Avoid dark-colored packaging to prevent heat distortion

The product is classified as a non-hazardous material in the meaning of transport regulations.

15. Regulatory Information

With regards to dust formed as a consequence of mechanical treatments, the appropriate regulations value limits for fine dust must be observed: MAC value (fine dust) – 5mg/m³.

United States Federal Regulations

No substances are subject to TSCA 12(b) export notification requirements.

US. EPA CERCLA Hazardous Substances (40 CFR 302) Components:
None

SARA Section 311/312 Hazard Categories:
Non-hazardous under Section 311/312

US. EPA Emergency Planning and Community Right-To-Know Act (EPCRA) SARA Title III Section 302 Extremely Hazardous Substance (40 CFR 355, Appendix A) Components:
None

US. EPA Emergency Planning and Community Right-To-Know Act (EPCRA) SARA Title III Section 313 Toxic Chemicals (40 CFR 372.65) - Supplier Notification Required Components: None

Under RCRA, it is the responsibility of the person who generates a solid waste, as defined in 40 CFR 261.2, to determine if that waste is a hazardous waste.

State Right-To-Know Information

The following chemicals are specifically listed by individual states; other product specific health and safety data in other sections of the SDS may also be applicable for state requirements. For details on your regulatory requirements you should contact the appropriate agency in your state.

The concentrations reported below in units of parts per million (ppm) or parts per billion (ppb) are maximum values.

CFATS (Chemical Facility Anti-Terrorism Standards) Chemicals

To the best of our knowledge, this product does not contain Appendix A Chemicals of Interest (COI), at or above the Screening Threshold Quantity (STQ), as defined by the Department of Homeland Security Chemical Facility Anti-terrorism Standard (CFATS, 6 CFR Part 27).

Based on information provided by our suppliers, this product is considered "DRC Conflict Free" as defined by the SEC Conflict Minerals Final Rule (Release No. 34-67716, File No. S7-40-10; Date: 2012-08-22).

16. Other Information

Recommended Uses And Restrictions

Please consult the relevant product and/or application information for this product.
